Our customers report increased activity in equipment repair and replacement parts sales. Indicators of strained public finances are creating similar opportunities in the area of commercial cleaning equipment and related products. Municipalities and public institutions like universities are employing new methods for identifying potential suppliers for equipment and related service parts. In many cases they are outsourcing repair and maintenance of equipment to permit the utilization of paid staff to maintain other services.

Private entities are employing similar strategies in the face of similar budgetary pressures. This encourages a fresh look at repair, maintenance, and replacement of commercial cleaning products as a way to broaden a specialty retailers business model and lay the ground work for future growth opportunities.

Cen-Tec Systems offers an extensive offering of on demand proprietary and replacement commercial cleaning accessories to support the commercial cleaning OEM, distributor, retailer, and contract cleaner. In many cases these products exceed the quality and features found on new equipment.

fect fit to the individual doing the cleaning. Compatible with most major brands they allow for a step-up from the typical OEM product.

If circumstances demand, an aluminum telescopic extension is available. These unique products along with a wide range of traditional straight, curved, and telescopic wands are available in plastic, aluminum, and chrome steel.

NOZZLES:

No matter the need, combination rug-floor, floor brush, squeegee, carpet or combination nozzle Cen-Tec has them available in 1.25", 1.35" and 1.50". Designed for the occasional user to the industrial plant where the tool is subject to daily use in a demanding application we have them. Available in metal, plastic, as individual tools or as a master tool set we have the range and neck styles necessary to support repair, replacement, or new equipment needs on demand at very competitive prices.

ACCESSORIES:

Need a metal crevice, a full fill natural dusting brush, or a gulper tool for your shop vac, industrial vac, backpack, or wet

WANDS:

In addition to the popular single piece and

two piece s-wands Cen-Tec Systems offers the only ratchet telescopic s-wand and j-wand system on the market. These wands allow length adjustment at one inch intervals for a per-

dry machine we have them in stock and available. We can even provide the hard to find items like dissipative accessories necessary for critical vacuum applications.

HOSE:

Featuring the patented Varioflex design we have multiple grades of crush proof hose in diameters from 1.00" to 3.00". The Varioflex process allows us to provide both standard and conical hoses to match the needs of the application. Our trade marked Arc Relax and dissipative Arc Relief hose range insures the hose can meet the needs of the application. Available in a range of materials including PP, EVA, HDPE, and TPR with a full range of molded on and threaded ends we are confident we can provide the right solution for your vacuum hose needs. Cen-Tec Systems also offers a wide range of wire support hose using a variety of constructions to meet the needs of your application.

SWING BY:

Stop by our booth at the upcoming VDTA show to see our new industrial master tool available in both a j-wand or s-wand neck style. Built for rugged use this tool permits quick change of the tool for carpet, hard floor, squeegee., or brush squeegee use and comes with a three piece stainless wand at a price you won't believe. A visit will also permit you to see the new Arc Relax, and Arc Relief Varioflex hose, and other products which will support a full line commercial offering.

Cen-Tec Systems is entering it's 20th year of service to the floor care industry. Located in Bloomington Illinois, with offices in Canada and the United Kingdom, Cen-Tec Systems offers a full line of both proprietary and popular vacuum accessories, microfiber, commercial central vacuums, hose, and related products.
