and  **HAYDEN®**  
CENTRAL VACUUM SYSTEMS

## Moving forward together with the central vacuum industry

Canplas Industries Ltd. and Canplas LLC are members of the Aliaxis Group of companies, a worldwide leader in the field of building materials. The Aliaxis Group encompasses a broad base of specialized companies that are shaped by a unique blend of experience and expertise providing innovation and creativity to the markets they serve.

Canplas manufactures a wide range of thermoplastic products for the building industry including; plumbing drainage fittings and specialty products, roof ventilation products, siding accessories, central vacuum fittings and central vacuum valves.

Canplas has 25 years experience in the central vacuum industry and Vaculine, Canplas' brand for central vacuum valves, fittings and accessories, is considered a leader in this market. Advanced technology, equipment and production methods, superior performance materials and quality engineering has earned Vaculine a reputation for high quality and high value. From easy-to-read installation and assembly instructions,

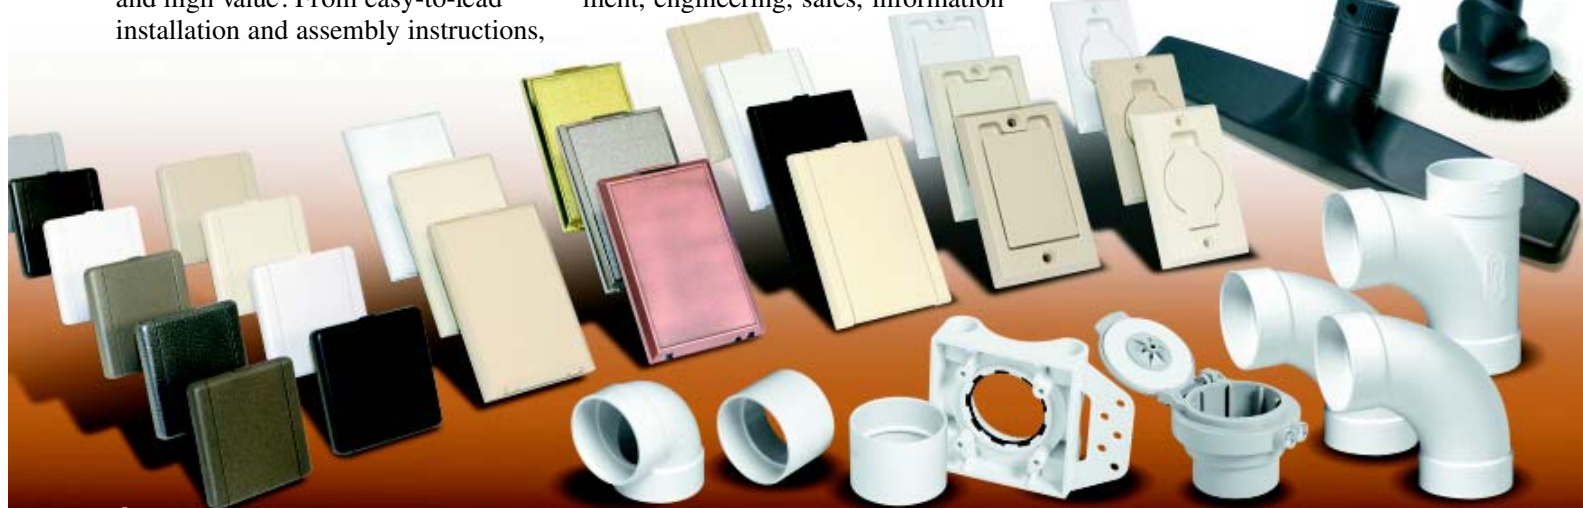

prompt delivery and service, quality assurance, to up-to-date product information, Vaculine supports customers large and small with strong independent representatives throughout the world.

The state of the art manufacturing facility and new distribution warehouse in Barrie, Ontario serve as the head office for all Canplas operations. The Barrie operations include in-house product research and development, engineering, sales, information

technology and marketing departments. Canplas also has warehouses and customer service locations in Edmonton, Vancouver, Denver and Tracy, CA, all of which are fed from the main distribution facility in Barrie.

Canplas products made in the Barrie manufacturing facility are shipped to markets throughout North America and the world including places as far away as Australia, Malaysia, Israel, United Kingdom and Sweden.

On March 1, 2007, Canplas Industries acquired the business and certain assets of Hayden Industries, another leading manufacturer of central vacuum systems and components.

## Formed in 1972, Hayden focused on supplying quality product to the central vacuum industry.

This specialized approach established Hayden as a leader in innovation and quality. Prior to the acquisition by Canplas, Hayden had been the only company in North America to manufacture all of the required components of a complete central vacuum installation.

We invite all partners and friends of Canplas to move forward together and enjoy the prosperity of this growth in the central vacuum industry.

Further, with the two brands – Vaculine and Hayden, Canplas is now the market leader in the fitting and valves product category.

The combined business now allows Canplas to offer the widest range of central vacuum products to the industry.

While Canplas' primary focus continues to be fittings and valves, the addition of the Hayden brand allows

for participation in all of the central vacuum product categories.

The central vacuum industry is poised for strong growth. The emergence of new technologies for central vacuum products will bring change to the industry. At Canplas,

new products, concepts and technologies are a top priority and the combined strengths of Canplas and Hayden provide the platform with which the combined companies can be on the leading edge of this growth. ❖
